AI MAKES YOU MORE PRODUCTIVE.

Keep using AI. Hold it accountable.

Aggi ARIA, the Aggi Responsible Intelligence Assessor, checks the AI you use: on your own computer and across your company.

Make your AI behave. Prove it complies. Know which AI you can trust.

Aggi Technologies · Plano, Texas · Since 2008

WHO WE ARE

Aggi Technologies has helped companies adopt new technology without opening new risks since 2008: networks and applications, then the cloud, connected devices, and now AI. We make Aggi ARIA (the Aggi Responsible Intelligence Assessor), three products that keep AI accountable, for people and for companies.

THE PROBLEM WE SOLVE

- AI models and agents change with every new version, often without notice.
- People are accountable; AI tools answer to no one.
- Customers and auditors now ask how your AI is tested, and want evidence.

AGGI ARIA TRUST

Know which AI you can trust

Shows which AI tools are on your computer, or your company's computers, and what each can reach.

Personal: early access December 1, 2026 (Windows, Linux); $5 a month or $50 a year, up to 3 computers
Business: founding companies until January 31, 2027

AGGI ARIA BEHAVE

Make your AI behave

Tests the AI your product or app runs on, on a schedule, and tells you when its answers change.

For companies and developers · from $30 a month

AGGI ARIA COMPLY

Prove it complies

Testing, optional live checks, and evidence mapped to the rules your buyers name, ready for your auditor.

For companies · walkthrough on request

900+ behavioral tests: questions with a clear rule for a good answer, run the same way every time

19 live checks on AI traffic routed through our gateway: 8 before the AI answers, 7 on the answer, 4 AI reviewers

13 frameworks each result is tied to, including SOC 2, HIPAA, HITRUST, ISO 42001, NIST AI RMF and the EU AI Act

HOW WE WORK

- **We watch the AI, not people.** Not employee monitoring; on your own computer, nothing about you leaves it.
- **Beside your tools.** Your security tools, compliance platform and auditor stay.
- **Honest status.** We say what is available, in pilot or being built.
- **A safety net,** not a guarantee.

HOW TO START

1. **For you:** join early access, or take the free personal AI check at aggicorp.com.
2. **For your company: a short talk.** Thirty minutes on the AI you use and what worries you.
3. **A first look.** A free check of a few computers, or a first round of tests on your AI, with plain answers.
